

AIMS

Development of didactical training material organised in well contained curricular modules to promote, stimulate and support the implementation of the revised EMAS (EMAS II) regulation and its verification.

- Promote the development of the quality and of the capacity of innovation of the training systems and devices of the involved partners.
- Diffusion of products and results of the pilot project, extended to the adaptation and the transference of vocational training methods inside training systems of the involved countries.
- Production of materials for diffusion and availability in what concerns effective dissemination purposes.
- Consistent coordination of promotion objectives through work meetings and seminars.
